## TIAM project has officially begun!

(17-05-2010, CERpIE-UPC, Barcelona)

TIAM project officially began on May 1, 2010. TIAM project leader CERpIE (Centre Específic de Recerca per a la Millora i Innovació de les Empreses) of UPC (Universitat Politècnica de Catalunya, Spain) successfully held an important planning meeting with one of the project participants - CEMOC (Fundación IRCSS Ospedale Maggiore Policlinico-Mangiagalli, Italy) at INVASSAT (Instituto Valenciano de Seguridad y Salud en el Trabajo) on May 4, 2010, in Valencia, Spain. At the planning meeting, the agenda of the kicking-off meeting of TIAM has been set by the attendees. Attendees also proposed and scheduled tentatively for September and October a technical and training seminar on introducing hazard identification and risk assessment methods and tools.

The agenda of the kicking-off meeting of TIAM has been sent out to all the participants by CERpIE of UPC May 12, 2010. The meeting is going to take place on June 2, UPC, Barcelona. The main purpose of the project kicking-off meeting in June is to communicate with each other directly and to ensure a smooth and effective project beginning. For more information, please see June 2 TIAM Project Kicking-off Meeting Agenda. (Photos: Planning meeting in Valencia, May 4, by Bing Zhang.)
