

Weblog Mechatronics based Rehabilitation at Home (MRH)

The kick-off meeting of the subproject MRH took place on the 25th and 26th of May. The kick-off was held at the Upper Austria University of Applied Sciences (FHOO) in Linz (Austria).

1 Kick-off at the Upper Austria University of Applied Sciences in Linz

During the two day kick-off meeting the content and planning of the work packages were discussed. The program included visits to a number of laboratories of FHOO where short presentations were given of related experiments. The FHOO also organized a guided tour to a rehabilitation center situated near the University.

2 All participants in front of the Rehabilitation Center in Linz

During the presentation of all the excellent facilities available in this center a lively discussion was held on many aspects of the rehabilitation process.

The next meeting will be held at the end of September in Brescia. In the first work package the University of Brescia (Italy) is leading participant and during the international meeting in Brescia the first results will be presented and discussed for an audience of regional stakeholders.
